Date: 17th of March 2010

Catalogue Section: Seating
Product Manager: Troy Searle

Subject: Sorrento series Synthetic Rattan Wicker armchair

No Sag webbing

Dark Brown / Two Tone
Finish

We are pleased to introduce our Sorrento rattan wicker series armchair which is designed for a more leisure seating environment due to its deeper seat. Light weight and easy to lift and move around, the Sorrento allows for a comfortable seating experience.

The Sorrento series synthetic rattan furniture is both sturdy and flexible. Manufactured with a heavy duty welded aluminium frame, it does not use any nuts / bolts to hold together and therefore preventing movement unlike other wicker furniture products in the market. The frame is additionally powder coated black to provide excellent protection from the elements.

The synthetic wicker is expertly woven over the frame that makes the collection possible to endure all weather conditions and will stand up to sunlight and rain. The synthetic wicker has been made to avoid cracking, splitting and unravelling.

Nylon webbing is included for increased support to prevent the woven wicker seat from sagging with constant use.

The maintenance for synthetic wicker furniture does not need to be treated or maintained. The wicker has excellent ageing qualities and strength to withstand the frosts in winter and the heat waves in summer. It is known to be the best for outdoors as it is mould resistant, washable and fade resistant. It simply needs a clean down with warm water and wiped dried.

Choosing to mix and match lounge suites or tables with our seating collection creates more options, more opportunities and more selections for furniture ensembles.

The Sorrento seating collection is backed with a 2 year manufacturer's warranty and meets the standards required by hotels, cafés, restaurants and resorts.
